

Role Description

OPERATIONS & PROCESS IMPROVEMENT COORDINATOR

Location:	Philippines (Remote)
Employment Type:	Full-Time
Reports To:	Perry Sandoval (Direct) Aaron Kelly & Ben Young (Indirect)
Works Across:	Cleaning Division (initially), Special Projects and Projects (eventually)

COMPANY OVERVIEW

Premrest has been in the flooring game since 1987, becoming Australia's go-to expert for commercial flooring: installation and cleaning. In 2019, two long-time employees took over the business, bringing fresh energy to a company with a strong foundation.

We're not your average cleaning company. We're specialists, innovators, and problem-solvers. We work with leading manufacturers, facility management firms, and national clients to provide top-tier floor maintenance solutions. At the heart of it all? A team that's driven, fun, and dedicated to excellence.

POSITION OVERVIEW

This is a new role created to drive operational efficiency across Premrest. You will be responsible for building and implementing the systems, processes, SOPs, and AI-powered automations that help every division work smarter.

This role starts with the Cleaning Division as the primary focus, then expands to support Special Projects and Projects as processes mature. You'll work closely with both the General Manager of Cleaning and the Managing Director to identify where time is being wasted, where handovers are breaking down, and where technology (particularly AI) can eliminate repetitive work.

KEY RESPONSIBILITIES

1. SOP Development & Process Documentation (40%)

1. Audit existing workflows across the Cleaning Division to identify gaps, inefficiencies, and undocumented processes
2. Build clear, practical Standard Operating Procedures (SOPs) that staff actually use
3. Create onboarding documentation for new team members and subcontractors
4. Develop standardised templates for recurring tasks: access requests, field reports, service summaries, client communications
5. Establish Slack communication procedures so information is organised, searchable, and accessible to the remote team
6. Maintain and update all SOPs as processes evolve

2. AI Implementation & Automation (30%)

1. Build and maintain Claude skills (AI automations) that reduce repetitive manual work across the business
2. Identify high-impact automation opportunities: job reminders, invoice matching, report generation, scheduling prompts, client communications
3. Work with the Client Services team to understand their pain points and build solutions
4. Train team members on how to use AI tools effectively in their daily work
5. Test, refine, and iterate on automations to ensure they save time and reduce errors
6. Stay across new AI capabilities and identify how they can benefit Premrest

3. Systems & Workflow Optimisation (15%)

1. Work with the Managing Director and development team to improve Pulse (ERP) workflows
2. Identify system bottlenecks and propose solutions: better search, improved scheduling views, data entry shortcuts
3. Support the build-out of divisional reporting dashboards in Pulse
4. Ensure data integrity across Pulse, Google Workspace, and Slack

4. Cleaning Division Admin Support (15%)

1. Continue supporting the Cleaning Client Services team as needed during transition
2. Provide backup coverage for the Client Services Administration Assistant during leave or peak periods
3. Maintain knowledge of day-to-day cleaning operations to ensure SOPs and automations stay grounded in reality

REQUIREMENTS & SKILLS

- Experience in operations, process improvement, or administration within a service-based business
- Demonstrated ability to write clear, practical documentation (SOPs, guides, templates)
- Strong interest in and aptitude for AI tools (Claude, automation platforms)
- Proficiency in Google Workspace (Gmail, Calendar, Docs, Sheets)
- Experience with ERP or CRM systems (Pulse, or similar)
- Excellent written communication: clear, concise, and structured
- Self-starter who can identify problems and build solutions without waiting to be told
- Strong attention to detail with the ability to see the bigger picture
- Comfortable working remotely and managing your own time across multiple priorities

COMPANY VALUES

- **Floor Them:** Deliver work that genuinely impresses
- **Be a Sponge:** Stay curious, keep learning, absorb everything
- **Work as One:** The team wins together
- **Be Bold & Kind:** Speak up, take initiative, and treat people well
- **Own It, No Short Cuts:** Take responsibility and do it properly

WHAT SUCCESS LOOKS LIKE

- SOPs exist for every core process in the Cleaning Division within 6 months
- At least 3 high-impact automations are live and saving the team measurable time
- Field report chasing reduces significantly because handover SOPs are in place
- New team members can onboard faster because documentation is clear and complete
- The approach is proven in Cleaning and ready to roll out to Special Projects and Projects
- Slack conversations follow a set structure so information is findable
- Aaron, Perry, and the team can point to specific processes that are easier because of your work

CAREER GROWTH PATH

This role is designed to grow. As you deliver results in the Cleaning Division and expand across the business, the natural progression is toward an Systems or Process Manager role down the line.
